

Name _____

Cell Picture Book

You will create a short, illustrated story to demonstrate your knowledge of cells and their organelles. The audience is little kids, so be sure not to use too many technical terms when describing the functions of the organelles.

Your story should include:

- Title
- Define Cell
- Difference between Cell, Tissue, and Organ
- Includes the Organelles
 - Separate color drawing of each
 - Description of the function of each
 - Tell whether it's found in a plant or animal cell (or both)
 - Cell Wall
 - Cell Membrane
 - Cytoplasm
 - Lysosomes
 - Vacuoles
 - Ribosomes
 - Endoplasmic Reticulum
 - Golgi Bodies
 - Chloroplasts
 - Nucleus
 - DNA
 - Mitochondria
- Told from point of view of a visitor, sort of like the Magic School Bus

Due Friday!!
